SAFETY BARRIER SYSTEMS

BBS 22 Restraint Barrier

A crash tested water-fill restraint barrier manufactured from prime UV stabilised polyethylene providing a versatile and strong one piece system.

- Barriers supplied Red and White as standard.
- Tested free standing, no permanent fixings.
- One piece moulding no added sections.
- Wide design fork lift slots for ease of visibility by fork lift driver.
- Easily deployed and handled by own workforce, no specialist training required.
- Securely stackable.
- Fencing Available
- Barrier is locked together in the centre with a steel pin formation and for added strength two flat steel plates are screwed into place.
