

BBS Buddha Barrier

The Buddha Barrier is a uniquely designed, completely anti-trip water-filled separator. At 0.8m in height, it creates a safer environment for pedestrians over traditional Water-filled Separators. The Buddha Barrier can be fitted with a metal fence panel to create a barrier height of over 1.8m.

Features:

- Reflective on both sides
- Stable & Secure stacking
- Completely Anti-Trip
- Connect to one another using the S-Clip
- Concave area can be used for spoil placement
- Two can be faced together over exposed holes & damaged manhole covers
- Capacity to hold 22 litres bringing the complete weight to 27.2kg
- Automatic overflow indication prevents overfilling
- Manufactured from HDPE & Completely recyclable
- Can be positioned at a connection of over 90 degrees
- Forklift entry for easy transport.
- 25 units per pallet

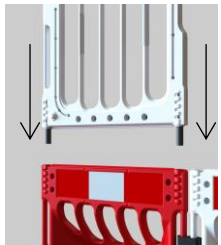

Standards:

- Conforms to **BSEN12899-1** (Reflectivity)

Barrier Specifications:

Height: 800mm **Width:** 1040mm
Depth: 280mm **Weight:** 5.5kg (empty) 27.5kg (filled)

Top Panel Installation:

Align each Double top leg with the open holes, and push the Panel down into the Barrier. NB DoubleTop can go into the Buddha either way

The direction for installation is determined by which side the hole for the Hook is on. This always comes first. No Coupler required.

Buddha Installation

Place each Buddha in a Red & White order and connect using the S-Clip

Fill each barrier with water

When water can be seen coming from overflow hole, stop filling
