

TRAFFICSACK®

THE INSTANT SANDBAG *FOR ROADSIDE MAINTENANCE*

How to use the TrafficSack©

In its original form the TrafficSack weighs less than half a kilo.

When ready to use it, you simply **soak the TrafficSack in water** and in minutes its super absorbent polymer filling absorbs up to 7kg of water retaining its weight without leaking. You create the weighty ballast you need just when you need it..

- A safe, eco-friendly replacement for the sandbag
- Ideal for ballast use each sack weighs up to 7kg when activated.
- Retains its weight for up to 3 months
- Expands quickly in contact with water absorbing up to 20 litres weighing approx 20 kilos.
- Eco friendly - contains pulps and super absorbant polymer.
- Easy to dispose - simply slit the sack and disperse the contents into the earth.
