

Border Group MOBILE VEHICLE BARRIERS

THE ARMIS GO TEMPORARY ACCESS PROTECTION WITH MAXIMUM FLEXIBILITY

Protecting people while keeping pedestrian routes open, the ARMIS GO mobile vehicle barrier delivers robust protection against unauthorised vehicle attacks, providing peace of mind in busy, high-footfall environments.

ARMIS GO ensures secure access control for vehicles while maintaining fully open and safe routes for pedestrians, cyclists, and wheelchair users. Even during large-scale events with heavy foot traffic, this innovative solution protects without restricting the free flow of people.

Designed for quick, intuitive deployment, ARMIS GO can be simply placed on the ground without the need for anchoring or installation. Within moments, the barrier is operational, as a single unit, in series, or in combination with a vehicle access barrier for enhanced protection.

- Certified as a single module
- Exceptionally low penetration depth (12.3 m)
- Discreet yet highly visible design
- Fully accessible for pedestrians, cyclists, and wheelchair users
- Maintenance-free and highly resistant to tampering and vandalism
- A lockable pallet truck slot prevents unauthorised insertion and movement, enabling secure, tool-free relocation when needed
- Rubber feet prevent surface damage and adapt to uneven terrain
